PHP (3 yrs.)

Interests

UI/UX design
Web development
Foreign languages
Music education
Teaching / speaking
Photography

Professional experience

- 2024-26 **Senior iOS engineer** · *Quizlet*, Seattle WA
Developed student-facing experiences such as Quizlet Workspaces, and subfolders. Lead a distributed team on recommendation landing page project. Managed development environment infrastructure in order to maximize developer productivity.
- 2024-25 **iOS developer** · *Freelance*
App development and project management for a client's iOS app [under NDA] that interacts with a haptic device. Technologies leveraged include SwiftUI, external DSP library, custom UI controls, and Bluetooth. Set up automation to release app to external users for testing and feedback.
- 2020-24 **Senior iOS engineer** · *PayPal*, Seattle WA (remote)
Developed new iOS experiences in Loyalty, Rewards, and Shopping, addressing technical debt, release, and on-call needs. Created the app's first Mobile Safari extension. Contributed to a redesign of the app in 2023, ensuring quality through code reviews, memory optimization, and testing with XCUI Tests/FBSnapshotTestCase libraries. Hosted knowledge sharing sessions through the organization to encourage adoption of best practices.
- 2016-20 **iOS and web engineer** · *Groupon*, Santa Clara CA & Seattle WA
Owned the development of over 25+ features in the Groupon iOS app and Groupon Goods web presence, supporting key business goals such as Groupon+ and Groupon Select. Wrote extensive unit test and UI automation suites for stability and regression tracking. Contributed to a significant app-wide re-architecture of the deal page screens.

Education

- 2012-16 **B.S. Computer Science; Minor in Music** · *Univ. of Washington*, Seattle
- Direct admission into Computer Science, 2012
 - Dean's List candidate, 2012–16
 - CSE undergraduate teaching assistant, 2014–16
 - Webmaster, ASUW (student government), 2013–14

Projects

AllTheStops app Used AI tools such as Cursor and ChatGPT to create a full-stack iOS app for users who want to discover pipe organs nearby. Leveraged MapKit / user location to create a dynamically updating MapView. Released on App Store in 2025.

HowManyCities iOS clone iOS version of the famous city-guessing quiz where you have to name every city in a given part of the world. Leveraged MapKit optimized with MapCache to visualize a user's guesses, and wrote extensive unit tests.

Odo proxy software Redesigned Groupon's open-source proxy software, using the Bootstrap framework, introducing usability features such as keyboard navigation.
